### Flexible and Durable Auditorium Chair

JumpSeat by Ziba Design is the latest addition to the Sedia Systems family of fixed seating solutions, ideal for lecture halls, theaters and auditoriums in educational facilities. The JumpSeat's simple and clean-looking design is made to work with the human spine, allowing thick and rigid compressions, as well as thin and flexible tension components to provide strength and support, according to the company.

Compressive and tensile strength of plywood slats and steel enables the chair to fold, saving space. With its cantilever structure, the JumpSeat can support up to 600 pounds, while its small and compact size makes it easy to remove and store when not needed, according to the company. Seat covers attach quickly with velcro for easy replacement and cleaning. The JumpSeat is available with or without arms, in plywood, laminate or veneer and multiple upholstery options.

### Commercial Faucets

Moen Commercial offers the ultimate in durability and vandal resistance for commercial applications with its M Dura faucet line. Featuring a full array of heavy-duty single- and two-handle faucets, the models are designed for various applications, including bathrooms, labs, as well as kitchens. Backed by a five-year warranty against material or manufacturing defects, the faucets contain cast-brass bodies and ceramic disc cartridges encased in a durable brass shell for added strength. Built to withstand wearing down from constant use, they have a chrome finish that can resist harsh chemicals and cleaners, according to the company. A service kit with a 0.5-gallon per minute aerator is available for most M Dura models, ideal for LEED buildings. Also offered are four laminar flow interchangeable spouts for the M Dura S-series of faucets.

### Rubber Playground Surfacing

Surface America features the most complete line of rubber playground surfacing systems in poured, tiles and turf. Our PlayBound™ Poured-in-Place is a mixed and poured on-site surface. It's easily customized to meet the safety, design and aesthetic requirements of any playground. Our industry-leading percentage of material in the top surface significantly increases the playground surface's expected life. Our original system has a 7-year warranty. We call it Super-7. Our Extreme-10 is the same system, but with aliphatic urethane in the top surface. It's so durable and problem-free we extended its warranty to 10 years. Call 800-999-0555 or visit [SurfaceAmerica.com](http://SurfaceAmerica.com).

### High-Speed Hand Dryer

American Specialties Inc. introduces the TRI-Umph automatic high-speed hand dryer, the latest addition to the company's Roval Collection. Suitable for most applications such as schools and health care facilities, the dryer is comfortable and user-friendly with its ergonomic design. The patented three-air-outlet design blows consistent air for a faster drying time of up to 12 seconds, while its ceramic pad aids in the absorption and evaporation of water, avoiding pooling and drips, according to the company. With a flip of the dryer's internal switch, users can switch to heated air. Operators can also adjust the unit's air speed for reduced sound and energy use. The hand dryer features a filter system comprised of three layers for HEPA, odor, and anti-microbial management, manufactured to eliminate over 99 percent of airborne bacteria and particles, according to the company.
