

CASE STUDY

M60 Swing Away + Gnosi® Chairs
Coral Springs, Florida

Coral Springs Animal Hospital

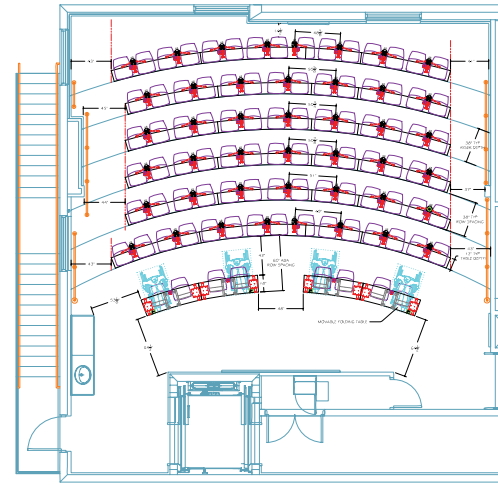

Project Overview

Ditman Architecture was challenged to design a one-of-a-kind lecture hall for doctor and staff presentations, K-9 training seminars, and conference live streaming. Critically important was providing a striking branded aesthetic while integrating speech intelligibility for optimal room performance. A unique audio and video package provided the ability to record, archive and broadcast live to a world-wide audience.

Additionally, one of the program goals of the project was to maximize seating capacity, and the M60 Swing Away was the preferred specification to balance seating capacity with aesthetics and comfort. Three custom curved X20 movable tables combined with loose Gnosi chairs were placed in the front of the lecture hall to provide easy maneuverability and offer flexibility in the front portion of the space.

Project Details

Project: Coral Springs Animal Hospital

Location: Coral Springs, Florida

Architect: Ditman Architecture

General Contractor: Dimensions Building Corp.
