

Eloy City Hall

Project Overview

Inspired by Eloy's rich history and culture, SmithGroup designed its City Hall as a facility to celebrate the town's roots and community. It was important to create a destination for the residents to carry on community traditions and celebrations, while also giving back to a community that is largely disadvantaged. Eloy's new City Hall serves as an extension of the park, providing ample public space to become the community's "living room." The Mercury Auditorium Chair was dressed up with wood laminate accents on the back and end panels, completing the look of this gorgeous space.
