CASE STUDY
P10 Auditorium Chairs
Iowa City, Iowa

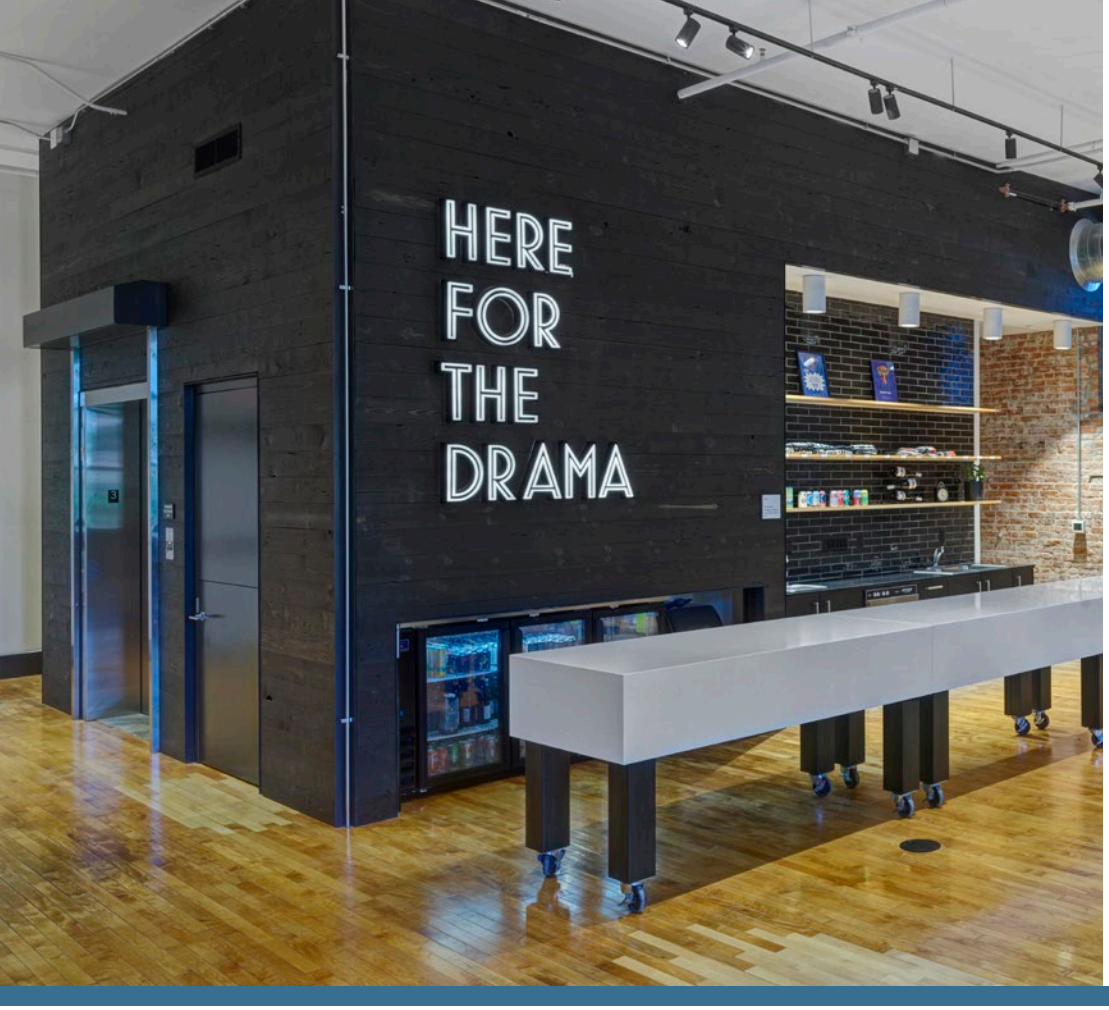
Riverside Theatre

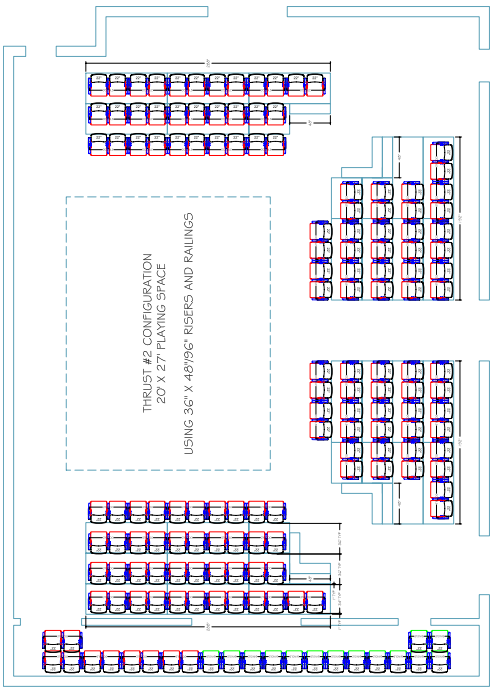
sediasystems

Project Overview

For more than four decades, Riverside Theatre has been a vital part of Iowa City's arts community. To support its growth, the theatre relocated to a historic building on Iowa City's pedestrian mall, where Neumann Monson Architects renovated the century-old structure into an accessible, flexible venue centered around a 150-seat black box theatre.

Sedia Systems provided fully movable P10 Auditorium Chairs, giving Riverside Theatre the comfort of permanent seating with the flexibility to reconfigure the space for each production. The result is an adaptable performance environment that supports the theatre's creative vision and continued role as a cultural destination.





Project Details

Project: Riverside Theatre

Location: Iowa City, Iowa

Architect: Neumann Monson Architects

Product: P10 Auditorium Chairs

Scope: 158 Positions of moveable P10 Auditorium Chairs

Configuration: Straight
