## MATERIAL CHEMISTRY

As a leading manufacturer of lecture hall and auditorium furnishings, Sedia Systems strives for sustainability and environmental stewardship. We offer numerous options to integrate recycled materials and renewable resources into our products and packaging.

We continually work towards the reduction of hazardous chemical associated with parts and materials we source. These include, among others, PVC, benzidine dyes, hexavalent chromium, certain hazardous phthalates, PBDE, flame retardants, and those chemicals known to contribute towards ozone depletion.

As part of our mission, Sedia Systems is always looking for more and better ways to limit our product's impact on the environment. Sedia Systems strives to find environmentally friendly components and options.
